

目 次

智能检测与建造技术专栏

多高层模块化建筑布局智能生成技术..... 刘界鹏,王俐强,夏 毅,齐宏拓,陈 杰,李 江,李嘉琛(1)

基于局部特征重识别的多台臂动施工机械工效分析方法..... 卢昱杰,钟利剑,魏 伟,王 硕(14)

基于响应数据图像化和深度残差收缩网络的结构损伤诊断 ..... 李书进,张杰玲,赵 源(28)

基于深度学习和图像识别的 RC 框架节点表面损伤检测评估研究 ..... 杨 铄,冷予冰,许清风(41)

基于机器视觉的混凝土人工振捣质量监测研究 ..... 王少洁,陈丽娟,吴青琳,史培新,陈 蕾(56)

基于深度学习的水下混凝土结构表观病害智慧识别方法 ..... 陈德津,张东林,叶锡钧,郑文智,周军勇(67)

基于集成学习的圆钢管再生混凝土短柱轴压承载力研究 ..... 张玉琢,席 萌,刘进隆,张信龙,刘发起(75)

基于机器学习的爆炸荷载下 RC 板最大位移响应分析 ..... 于晓辉,陈玉琛,代旷宇(85)

综 述

月壤的原位烧结成型技术研究综述..... 王志丰,刘一利,聂少锋,李建星(95)

煤矸石在中国路基路面工程中的应用研究进展..... 惠迎新,张 洗,袁化强,闫 升,马莲霞(112)

超高性能混凝土制备技术及其应用研究进展 ..... 史继创,王 朋,周 腾,刘 义,安占义,康科武(138)

建筑结构

外剪内框组合再生混凝土结构地震响应与抗震优化分析..... 肖建庄,程张翼,侯岷杰,丁 陶,肖绪文(152)

锈蚀 RC 框架节点核心区剪切恢复力模型 ..... 郑山锁,刘立国,董立国,杨 松,李 健,丛 峻(162)

有黏结预应力混凝土框架结构抗连续倒塌动力效应研究..... 李 治,麦彩霞,陈明哲,褚怡璇,钱 凯(173)

不同构造形式轻质叠合板受弯性能试验及弯曲刚度计算  
..... 权文立,黄 炜,苗欣蔚,安永健男,封 元(183)

超高层建筑顶升钢平台关键系统安装施工模拟分析..... 刘新钊,黄 华,曾凡奎(195)

大跨度双向曲线钢桁架屋盖结构日照非均匀温度场研究  
..... 李建华,邓 强,李保罗,唐国旺,樊健生,刘宇飞(209)

CONTENTS

Special column on intelligent detection and construction technology

|                                                                                                                                                  |                                                                                  |
|--------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|
| Intelligent layout generation technology for multi-story modular building                                                                        | LIU Jiepeng, WANG Liqiang, XIA Yi, QI Hongtuo, CHEN Jie, LI jiang, LI Jiachen(1) |
| Multiple articulated construction machinery efficiency analysis method based on local feature re-identification                                  | LU Yujie, ZHONG Lijian, WEI Wei, WANG Shuo(14)                                   |
| Structural damage diagnosis based on image processing of response data and deep residual shrinkage network                                       | LI Shujin, ZHANG Jieling, ZHAO Yuan(28)                                          |
| Study on surface damage detection of RC frame joints based on deep learning and image recognition                                                | YANG Shuo, LENG Yubing, XU Qingfeng(41)                                          |
| Research on monitoring construction quality of manually vibrated concrete based on machine vision                                                | WANG Shaojie, CHEN Lijuan, WU Qinglin, SHI Peixin, CHEN Lei(56)                  |
| Intelligent identification method of apparent defects in underwater concrete structures based on deep learning                                   | CHEN Dejin, ZHANG Donglin, YE Xijun, ZHENG Wenzhi, ZHOU Junyong(67)              |
| Study on axial compressive bearing capacity of recycled aggregate concrete-filled circular steel tubular stub columns based on ensemble learning | ZHANG Yuzhuo, XI Meng, LIU Jinlong, ZHANG Xinlong, LIU Faqi(75)                  |
| Maximum displacement response analysis of RC slabs under blast load based on machine learning method                                             | YU Xiaohui, CHEN Yuchen, DAI Kuangyu(85)                                         |

Review

|                                                                                                |                                                                       |
|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|
| Review of in-situ sintering forming technology for lunar soil                                  | WANG Zhifeng, LIU Yili, NIE Shaofeng, LI Jianxing(95)                 |
| Overview of application of coal gangue in roadbed and pavement engineering in China            | HUI Yingxin, ZHANG Shen, YUAN Huaqiang, YAN Sheng, MA Lianxia(112)    |
| Research progress on preparation technology and application of ultra-high performance concrete | SHI Jichuang, WANG Peng, ZHOU Teng, LIU Yi, AN Zhanyi, KANG Kewu(138) |

Building structure

|                                                                                                                                                |                                                                                |
|------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| Seismic response and optimization analysis of exterior-shear-wall with interior-frame (ESIF) structural system combined with recycled concrete | XIAO Jianzhuang, CHENG Zhangyi, HOU Minjie, DING Tao, XIAO Xuwen(152)          |
| Shear hysteretic model for core area of corroded RC frame joints                                                                               | ZHENG Shansuo, LIU Liguo, DONG Liguo, YANG Song, LI Jian, CONG Jun(162)        |
| Study on dynamic effect of bonded prestressed concrete frame structures in resisting progressive collapse                                      | LI Zhi, MAI Caixia, CHEN Mingzhe, CHU Yixuan, QIAN Kai(173)                    |
| Bending performance test and bending stiffness calculation of lightweight composite slabs with different construction form                     | QUAN Wenli, HUANG Wei, MIAO Xinwei, AN Yongjiannan, FENG Yuan(183)             |
| Simulation analysis of installation construction of key systems for jacking steel platforms in super high-rise buildings                       | LIU Xinzhao, HUANG Hua, ZENG Fankui(195)                                       |
| Research on non-uniform solar-induced temperature field in large-span bidirectional curved steel truss roof structure                          | LI Jianhua, DENG Qiang, LI Baoluo, TANG Guowang, FAN Jiansheng, LIU Yufei(209) |
